### **DETAILED ACTION**

This is in response to application filed on 12/19/01 in which claims 1-20 are pending. The application has been fully considered therefore this case is in condition for allowance.

#### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art of record fail to anticipate or render obvious the following recited features: estimating a group of at least one information symbol of the sequence by optimizing a criterion defined by the digital signal of said block, the estimated statistical parameters, at least one symbol of the sequence which is known a priori and each information symbol of said group; then, estimating said instantaneous amplitudes as a function of the digital signal of said block, of the estimated statistical parameters, of the symbols of the sequence which are known a priori and of the estimated symbols of said group as recited in claims 1 and 11. Estimating the autocorrelation vector of the instantaneous amplitudes on the basis of block portions corresponding to the symbols known a priori; selecting an entry of the table of vectors, containing the pre-calculated autocorrelation vector closest to the estimated autocorrelation vector as recited in claims 9 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Eryurek et al U.S. patent No 6,017,143 teaches a device in a process system for detecting events.
